PROFESSIONAL SUMMARY

Hands-on software builder and founder with 15+ years across web development, enterprise software delivery, distributed systems, and applied AI. Founded and built ClawBank, a production platform connecting AI agents to financial and legal infrastructure. Translates business requirements into architecture, API integrations, and deployed products. Focused on hands-on applied AI, full-stack, and forward deployed engineering roles.

TECHNICAL SKILLS

LANGUAGES & FRAMEWORKS

Elixir Phoenix Phoenix LiveView Python FastAPI JavaScript HTML CSS

APPLIED AI & INTEGRATION

AI agent workflows LLM integration Model Context Protocol (MCP) REST APIs CLI tools
Third-party API integration

SYSTEMS & DELIVERY

Background jobs Data normalization ETL Git CI/CD Containerization Technical discovery
Rapid prototyping Technical documentation

PROFESSIONAL EXPERIENCE

ClawBank — Founder & Builder

Jan 2026 – Present

- Founded and built a production platform enabling AI agents to form U.S. companies, open USD bank accounts, maintain corporate records, and negotiate and sign contracts through integrated providers.
- Architected the full-stack system with Elixir, Phoenix, and LiveView, supported by Python/FastAPI services, asynchronous background jobs, and third-party APIs.
- Unified banking, wallets, incorporation, and DocuSign workflows behind REST APIs, Model Context Protocol (MCP) tools, a command-line interface (CLI), and SMS.
- Implemented agent-to-agent contracting with onchain agreement records, escrow-backed milestones, and Kleros arbitration on Base; added ClawBank OS for websites, documents, marketing, and daily business execution.
- Platform adoption as of September 22, 2026: 1,633 agents, 95 USD bank accounts, 16 U.S. companies incorporated, and 45 contracts with 129 milestones.
- At the same snapshot, approximately \$298K in total value moved across 27,949 onchain transactions; 556,848 x402 transactions and 996 services listed.

Thrive Protocol — Head of Growth & Innovation

Aug 2025 – Jan 2026

- Designed and built the Thrive Guardian Network API, an x402-powered marketplace for programmatic research and project evaluation.
- Implemented deployable agents to gather, normalize, and score public project data against private rubrics, feeding structured diligence into an internal data lake and decision systems.

Quadratic Accelerator (q/acc) — Cofounder

Feb 2025 – Aug 2025

- Cofounded and launched a bonding-curve funding platform that reached the top ten launchpads by total value locked on DefiLlama; launched 12 projects.
- Integrated identity verification, Passport proof-of-humanity, and anti-sybil protections into project onboarding. Acquired by Thrive Protocol in August 2025.

Polygon Labs — DAO Business Development & Treasury Governance

Jun 2022 – Feb 2025

- Led technical business development for governance and treasury tooling; helped ecosystem teams select and deploy infrastructure, and designed and launched a community grants program of roughly \$100 million a year over 10 years.

BanklessDAO — Governance Solution Engineer

Jun 2021 – Feb 2023

- Cofounded FRAG Stack, a decentralized frontend stack using Radicle and IPFS; translated governance requirements into a constitution, operating handbook, and proposal standards.

UPMC Enterprises — Lead Program Agilist

Jan 2019 – Feb 2023

- Designed the delivery and scaling model for MyUPMC's 45+ engineers, aligning cross-functional teams and specialist groups with product ownership.
- Created the MyUPMC Agility Handbook and delivery metrics framework; established the Agile Working Group and MyUPMC University to make delivery practices repeatable.

Highmark — Program IT Team Manager

Jun 2018 – Oct 2018

- Organized four engineering teams to migrate three enterprise content systems to Adobe Experience Manager; introduced programmatic ETL-based migration rather than a page-by-page rebuild.

Fraction Software — Blockchain Consultant

Oct 2016 – Present

- Provide independent consulting on Ethereum and decentralized application architecture, assessing feasibility, platform tradeoffs, integration needs, and smart-contract constraints.

33 Mile Radius — Product Lead

Jan 2015 – Sep 2016

- Led migration from a local, single-user application to a containerized, cloud-based platform; decoupled the interface from backend build jobs to enable concurrent execution.

Sherwin-Williams — Developer

Jun 2014 – Jan 2015

- Rebuilt an acquired company's web catalog in 24 hours during an emergency migration, extracting product data into JSON and generating static pages with Handlebars.js.

Truth for Life — Developer

Mar 2013 – Jan 2014

- Built frontend experiences and campaign pages; introduced Git collaboration, BrowserStack cross-browser testing, and structured bug reporting.

Sherwin-Williams — Developer

Jul 2011 – Jan 2013

- Developed corporate and partner web properties, including a multilingual European portal built with international stakeholders and translators.

— SELECTED PROJECTS & WRITING

Tiny-model evals — Benchmarked small language models with and without retrieval-augmented generation (RAG) to compare results; exploratory evaluation work.

evals.justiceconder.com

Business Bench — Developing an early-stage harness for evaluating AI-driven business operations against business outcomes.

bench.clawbank.co

Cybernetic Org Design — Book on governance and organizational design for engineers.

cybernetic-org-design.xyz**— EDUCATION**

Stark State College — Associate of Applied Science, Computer Programming and Database Design

2009 – 2011

Graduated with academic distinction.
